

JLIF is one of Europe's largest listed infrastructure funds, with a premium listing on the London Stock Exchange. As a specialist equity stakeholder, we partner with public sector counterparties to deliver key local and national infrastructure projects. In return, these provide government-backed, inflation-linked revenue streams. Our success is built on a collaborative approach, centered on long term relationships with our clients such that their changing infrastructure needs can be met in a timely and cost-effective manner.

As at 31 March 2016, JLIF was valued at £1,081.4 million on the stock market and had delivered a total shareholder return of 60.0% since launch in November 2010. We now have stakes in 59 low risk, operational PPP infrastructure projects located in the UK, Continental Europe and North America, and look forward to continuing to grow the Portfolio in the future.

Investment Objective

A strong, predictable dividend yield with an annual minimum target of 6% on the IPO Issue Price and an IRR target of 7%-8%.

Financial and Operational Highlights

31 March 2016

- Underlying growth in Portfolio value for the three months to 31 March 2016 of 1.7% to £973.5 million on a rebased value of £957.2 million
- Announced a 1.04% increase in the dividend from 3.375pps to 3.41pps, in respect of six-month period to 31 December 2015, in line with UK inflation
- Net Asset Value ("NAV") of £1,000.6 million as at 31 March 2016, including £27.8 million allocated to dividend to be paid in May 2016
- NAV per share as at 31 March 2016 of 108.3 pence ex-div (111.7 pence cum-div), due to underlying portfolio growth over the period, positive unrealised exchange rate movements and the NAV-accretive equity issuance in March 2016
- Acquisitions of approximately £90 million in the first quarter of 2016, including JLIF's first investment in the Spanish secondary PPP market
- Strong pipeline of assets at advanced stage, expected to complete in coming months

Investment Policy

Summary

JLIF invests in assets which are predominantly:

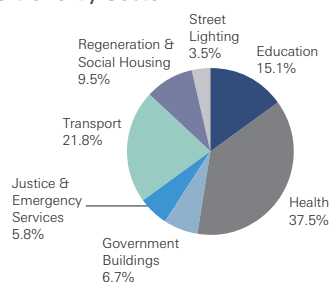

- in their operational phase, having completed construction
- backed by public sector or government revenue streams
- "availability based" (where the payments from the concession do not generally depend on the level of use of the asset)
- within the UK and in countries that are regarded as fiscally strong and with a satisfactory credit rating

In addition, JLIF may invest up to 10% of the Total Assets of the Fund in infrastructure assets that are not government-backed PPP assets but that have substantially the same risk profile and characteristics as PPP assets.
